

# ACCENTURE GRAD PROGRAMME – SORCHA - BUSINESS & TECHNOLOGY INTEGRATION

## VIDEO TRANSCRIPT

0:01

my name is Sorcha Hanway and

0:03

i am a business and technology analyst

0:05

in accenture technology

0:07

my day-to-day job involves testing

0:10

solutions so i'm a part of a client in

0:12

county cork for a global food and

0:14

beverage company. There's a couple of

0:16

skills that i think you need to be

0:17

successful in your role

0:19

and of course you need the hard skills

0:21

of having an analytical mindset

0:23

and problem solving but the skills that

0:25

i think have really helped me

0:27

be successful in my role are soft skills

0:30

based around your mindset

0:32

within accenture you are going to

0:35

be responsible for building your own

0:37

career and

0:38

you're not going to be i suppose no

0:41

one's going to be holding your hand

0:43

so it's down to you to make an

0:46

impact

0:47

and you know really put yourself out

0:49

there and if you

0:50

are not afraid to fail and if you're not

0:53

afraid to try something totally

0:55

different

0:55

then you're going to be successful the

0:57

reason why i chose  
0:58  
to go into business and technology is  
1:01  
because  
1:02  
when i was in college i didn't know what  
1:04  
i wanted to do  
1:06  
and i suppose the part of me still  
1:09  
actually thinks that  
1:10  
but i know that being in this company i  
1:12  
am in  
1:13  
a position where i can identify my  
1:16  
strengths and look at  
1:18  
what i what i enjoy and then i can work  
1:21  
with the company to then go into  
1:23  
different roles or different over  
1:26  
other parts of the company that i'd  
1:28  
enjoy so i think  
1:30  
if you're still unsure what you want to  
1:32  
do when you're figuring it out which  
1:34  
that is like the story of my life then  
1:37  
you're i know i'm in a good place now  
1:39  
i've tried so many different things and  
1:41  
i've told people who are looking at me  
1:43  
what i enjoy and

1:44  
they're helping me get there and put me  
1:46  
in the right place so  
1:48  
it's been very reassuring because i  
1:50  
think at this age and especially  
1:53  
in a covered world you're thinking what  
1:55  
am i going to do  
1:56  
who am i going to be but i know where i  
1:58  
am now that  
2:00  
i don't have to be worried i'm going to  
2:01  
figure it out along the way and i have  
2:03  
the people behind me to support it so  
2:05  
i've done a lot of research as people do  
2:07  
uh during the interview processes  
2:09  
and it was clear that accenture are not  
2:12  
just talking to talk they're actually  
2:14  
walking the walk whether it was from  
2:17  
environmental sustainability  
2:18  
or driving initiatives across the world  
2:21  
to  
2:22  
help people in disadvantaged areas they  
2:24  
were  
2:25  
doing so much of that and i hold stuff

2:27

like that so close to my heart

2:29

before i left college i was involved in

2:32

loads of different volunteering

2:33

and volunteering is an integral part of

2:36

accenture

2:37

we get two days volunteering a year we

2:39

have you know

2:40

a corporate citizenship division which

2:42

i'm so lucky to be a part of

2:44

and you know they really value ethics

2:48

and i think in 2020 that's something

2:50

that

2:51

is so so important
