ACCENTURE LABS TECH4GOOD

VIDEO TRANSCRIPT

[Music]

What if leaders in

business government academia non-profits

came together as
ONE

to build a more inclusive and sustainable world?
Accenture Labs Tech4Good program uses exponential technologies

to help solve critical challenges facing humanity and the planet.

Environment

Solutions that use AI to help preserve wildlife and accelerate nature conservation

Clean water

We built a predictive maintenance solution to help charity: water monitor water usage with data from thousands of smart pumps in remote locations

Equality

Our emotion analytics tool uses voice and facial recognition to help our non-profit partners improve lives

East London Business Alliance

Helping young job seekers improve interviewing skills

Grameen Foundation
Fueling the economic empowerment of women.

Fighting human trafficking with AI

Helping law enforcement agencies spot trafficking cases in a sea of classified ads

Inclusion

We used computer vision to help the visually impaired "see"

We partnered with BleeTech to help hearing impaired dancers feel music

Through vibrations using haptic watches.

Tech4Good

Innovation where it's needed most.
