### RISK TAKER

In conversation with Tarak Mehtae President of ABB Electrification and Member of the Group's Executive Committee

### What one word describes you best?

I would say risk taker. And so far, it has worked out well for myself at the personal level, also at the professional level.

### How are you and your team leveraging innovation and megatrends to power business growth?

So, the world is shifting to electricity as a source of power and energy. So that is what is driving, as you said, the megatrends. We have invested in making very compelling technical solutions, which have led to us having a number one market position when it comes to DC fast charging.

### What opportunities can help industrial companies achieve their ESG goals, while achieving your own?

Now we're working with our suppliers and customers to take industrial complexes and make them emissions-free through the use of and technology enablement that we see both on the Cloud-side but also with ABB products and solutions.

### What inspires you?

So, what inspires me on a personal level is to make a difference. When you look at the world today and see how many people - how much of the world doesn't have what the rest of the world takes for granted, whether it's vaccine access, whether it is access to electricity, water, so people who make a difference in those areas, the basics of necessity are a source of inspiration for me.

Catch the excitement and read the full interview at The Industrialist.
