

INNOVATORS, UNITE!

VIDEO TRANSCRIPT

The world faces new challenges every day but with our curiosity and creativity, love for technology, human ingenuity, combined with our ever-learning working environment. Accenture helps us develop our “superpowers” to be the drivers of change.

Hi I’m Wonder Anne.
I’m Captain Chester
I’m Magnificent Dathy
I’m Detective Michelle
I’m Amazing Vanessa
I’m Mighty Jimmy

My role is to create a mindset using structured methodology to drive measurable, repeatable and predictable delivery.

My duty consists of solving problems by utilizing existing technologies or building one for them.
I’m in charge of making sure that payment from the customers are received and allocated on time.
I identify business problems and opportunities that directly impacts our customers using data driver facts to derive insights and recommendations.

I help save our client money and time by leveraging on their data.

I do programming to create and improve processes and certainly make people more efficient in their processes.

Accenture developed an integrated model that enables 360 value creation. It gives the advantage of insights from artificial intelligence and data science that enables me to think of ways to make sure that results are predictable. Accenture is bold at revolutionizing the technology, cloud adaption save a huge amount of cost and it provides a lot of security for our business and our clients. We develop automation tools to eliminate manual steps for teams to perform in their most optimal level. Accenture has exposed me to automation technologies while I met complex processes. So it feels like I’m making more “Jarvis” to make more “Iron Man” in the processes. We are Accenture Innovators, innovating solutions at the heart of change.
