

MILAN INDUSTRY X INNOVATION CENTER FOR ENGINEERING

VIDEO TRANSCRIPT

Welcome to Milan
the city at the intersection of Italy's
engineering procurement and construction
talent with industry-specific know-how
technical expertise and world-renowned
creativity with a skyline that reflects
its dna
milan stands for drive dynamism and
daring to dream big
that's where we are today
and we believe tomorrow will be even
better more agile
more digital and proudly showcasing
Italy's best
a shift is underway across the sector
new technologies are converging to
impose new parameters smart processes
intelligent tools and agile ways of
working
at accenture we call it industry x which
is all about embedding intelligence
into manufacturing and operations
for eps it starts right here in Milan
at Accenture's newest industry x
innovation center for engineering
the center aims at enhancing the
performance of capital intensive
projects with
digital and ai enabled engineering
connected construction and project
control capabilities to make plants
sustainable and to boost delivery
certainty engineer capital projects
optimally and deliver them on time and

on budget
HOW?
ENGINEERING WITH INTELLIGENCE
by orchestrating a unique mix of
industry-specific knowledge
digital competencies and a profound
understanding of market dynamics
accenture can unlock the full power of
new technologies
to deliver forward-looking effective
solutions to some of the industry's
greatest business challenges
from cost control to the quality of
project deliverables
we help make business decisions more
efficient through real-time decision
support
site material tracking and smart design
review our
innovative tools such as unified
operating control center and connected
industrial worker applications help
companies achieve
levels of safety transparency
collaboration and
time and cost control that are greater
than ever
at our innovation center investors
contractors and suppliers can now
experiment and take an agile approach to
machine learning robotics ai
blockchain and 3d modeling tools to
create immersive experiences to generate
and test new ideas and create solutions

that are scalable across their wider ecosystem especially for energy and utilities manufacturing and large infrastructure companies shape new high value-added services based on proof of concept and prototyping to help make EPC businesses more competitive from project definition through to plant execution always be at the cutting edge of industry trends innovation engineering better together in a single center that joins our network of over 33 industry x innovation centers across the world Des Moines Detroit Houston Bilbao Essen Modena Tokyo Network Industry X Innovation Centers welcome to the accenture industry x center for engineering in Milan it's where we embed intelligence connect people processes and technologies to transform business challenges into multiple opportunities it's all about tomorrow talk to us today
