Accenture Cloud Innovation Center

Pushing custom cloud solutions to the max.

Cloud delivers undeniable benefits – agility, rapid innovation and lower IT costs.

The Accenture Cloud Innovation Center harnesses the full potential of Cloud to custom build latest generation solutions for our clients.

We can give our clients access to a catalog of tested real cases to imagine, test and implement leading edge cloud services that can help take your business into tomorrow.

Now.

Accenture

ACIC Rome brings together Accenture’s deep technical know-how and industry expertise to help companies deploy cloud to transform their journey to cloud. At a time when innovation is racing ahead, Accenture is broadening its collaboration with leading cloud solution vendors to have instant access

to the level of specialist services that can help meet our clients’ specific business objectives. At ACIC Rome, **webring together** not only the major technology vendors but **the best offerings** from emerging providers in step with market evolutions. Our clients benefit from the very latest real and tested solutions.

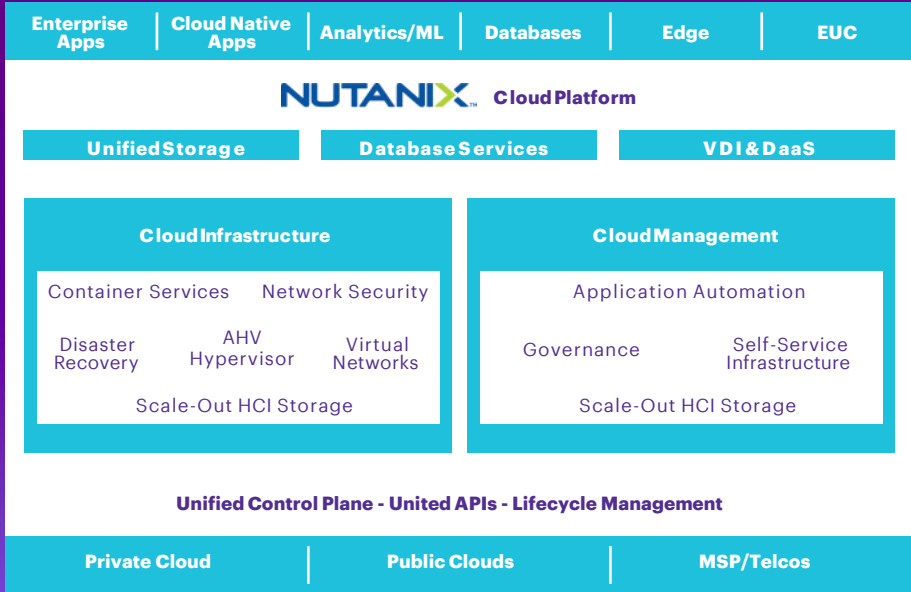

About Nutanix

Nutanix is a global leader in cloud software and a pioneer in hyperconverged infrastructure solutions, making computing invisible anywhere. Organisations around the world use Nutanix software to leverage a single platform to manage any app at any location at any scale for their private, Hybrid and Multi Cloud environments.

The Nutanix Cloud Platform:

Secure, resilient, and self-healing platform for building your Hybrid MultiCloud infrastructure to support all kinds of workloads

Why Hybrid Multi Cloud with Nutanix

Fast

Build a Hybrid Cloud in under an hour

Simple

Manage all your clouds as one

Resilient

Reduce disaster recovery from days to hours

Seamless

Cloud migration with no code change

Portable

Same Software, same licenses, no cloud lock-in

The Partnership With Nutanix

Nutanix has partnered with ACIC to prototype solutions mainly focusing on two of its products: **Multi-Cloud Governance and Optimization** and **Multi-Cloud Governance for End User Computing (EUC)**.

Application Modernization

Multi-Cloud Governance and Optimization

Leveraging on Calm capabilities is possible to help customer to manage Multi and Hybrid Cloud infrastructure leveraging on automation capabilities, while optimizing infrastructure usage via Xi Beam. All managed through customizable workflow managed via SNOW integration.

Context and client challenges

- Companies adopting Hybrid Cloud scenarios, need a solution helping to manage, govern and optimize cloud and non-cloud resources usage.
- However, it is often extremely difficult to deploy and manage applications that span clouds. Deployment processes are error prone and unreliable, and complex management increases costs and decreases business agility.

New approach and solution

- To address the challenges associated with Multi and Hybrid Cloud infrastructure and application automation, monitoring, and governance, Accenture and Nutanix have defined a solution, based on Nutanix Calm, Xi Beam and Prism Central, to simplify and accelerate Hybrid and Multi Cloud adoption.

Client benefits

- **Rapid Innovation:** Blueprinting, automated provisioning and rapid application deployment help speed up innovation.
- **Decreased time to market:** Clearly defined workflows and rapid innovation cut your time to market.
- **Avoid vendor lock-in:** Leverage multiple Public Clouds without excessive complexity.
- **Improve agility:** Accelerate application deployment with E2E process automation for provisioning or other action.
- **Increased security and decreased costs:** Multi Cloud security and cost control deliver optimal results.

Application Modernization

Multi-Cloud Governance for End User Computing (EUC)

In a multi cloud and multi technologies contexts, the constant alignment of virtual client environments (from Operating System update to installation of new Applications), is one of the big challenges to address.

Accenture and Nutanix, leveraging on CALM capabilities, have developed a Software DevOps Lifecycle model helping Customer to simplify and automate this process.

Context and client challenges

- In the Covid Era, Companies are working to bring workforce to work safely and securely. This increase the request to improve and empower their Workplace systems and adopt solution to automate their provisioning.
- Enabling an elastic digital workplace experience, requires modern, stable, scalable platforms and applications in combination with devices that are cost efficient and secure, integration services, and an evergreen IT operating model.

New approach and solution

- Accenture and Nutanix have architected an End User Computing (EUC) solution that addresses these challenges, allowing organizations to simplify EUC deployment and ongoing management. The solution leverages Citrix VDI and Nutanix Frame to enable true Hybrid and Multi Cloud EUC environments. The combination of Accenture's expertise in enterprise environments and Nutanix's innovative technologies enables IT organizations to automate and optimize critical EUC workflows, including application and infrastructure deployments.

Client benefits

- **Decrease time to market:** Automated workflows ensure software can be tested and released quickly.
- **Avoid vendor lock-in:** Choose from a selection of infrastructure and EUC platforms.
- **Improve agility:** End-to-end process automation reduces manual effort and friction between teams.
- **Reduce risk:** Ensure that software and OS bug fixes reach production quickly; reduce potential exposure to CVEs.

About Accenture

Accenture is a leading global professional services company that helps the world's leading businesses, governments and other organizations build their digital core, optimize their operations, accelerate revenue growth and enhance citizen services — creating tangible value at speed and scale. We are a talent- and innovation-led company with approximately 733,000 people serving clients in more than 120 countries.

Technology is at the core of change today, and we are one of the world's leaders in helping drive that change, with strong ecosystem relationships. We combine our strength in technology and leadership in cloud, data and AI with unmatched industry experience, functional expertise and global delivery capability. We are uniquely able to deliver tangible outcomes because of our broad range of services, solutions and assets across Strategy & Consulting, Technology, Operations, Industry X and Song. These capabilities, together with our culture of shared success and commitment to creating 360° value, enable us to help our clients reinvent and build trusted, lasting relationships. We measure our success by the 360° value we create for our clients, each other, our shareholders, partners and communities.
